

Photosynthese mit Algenbällen

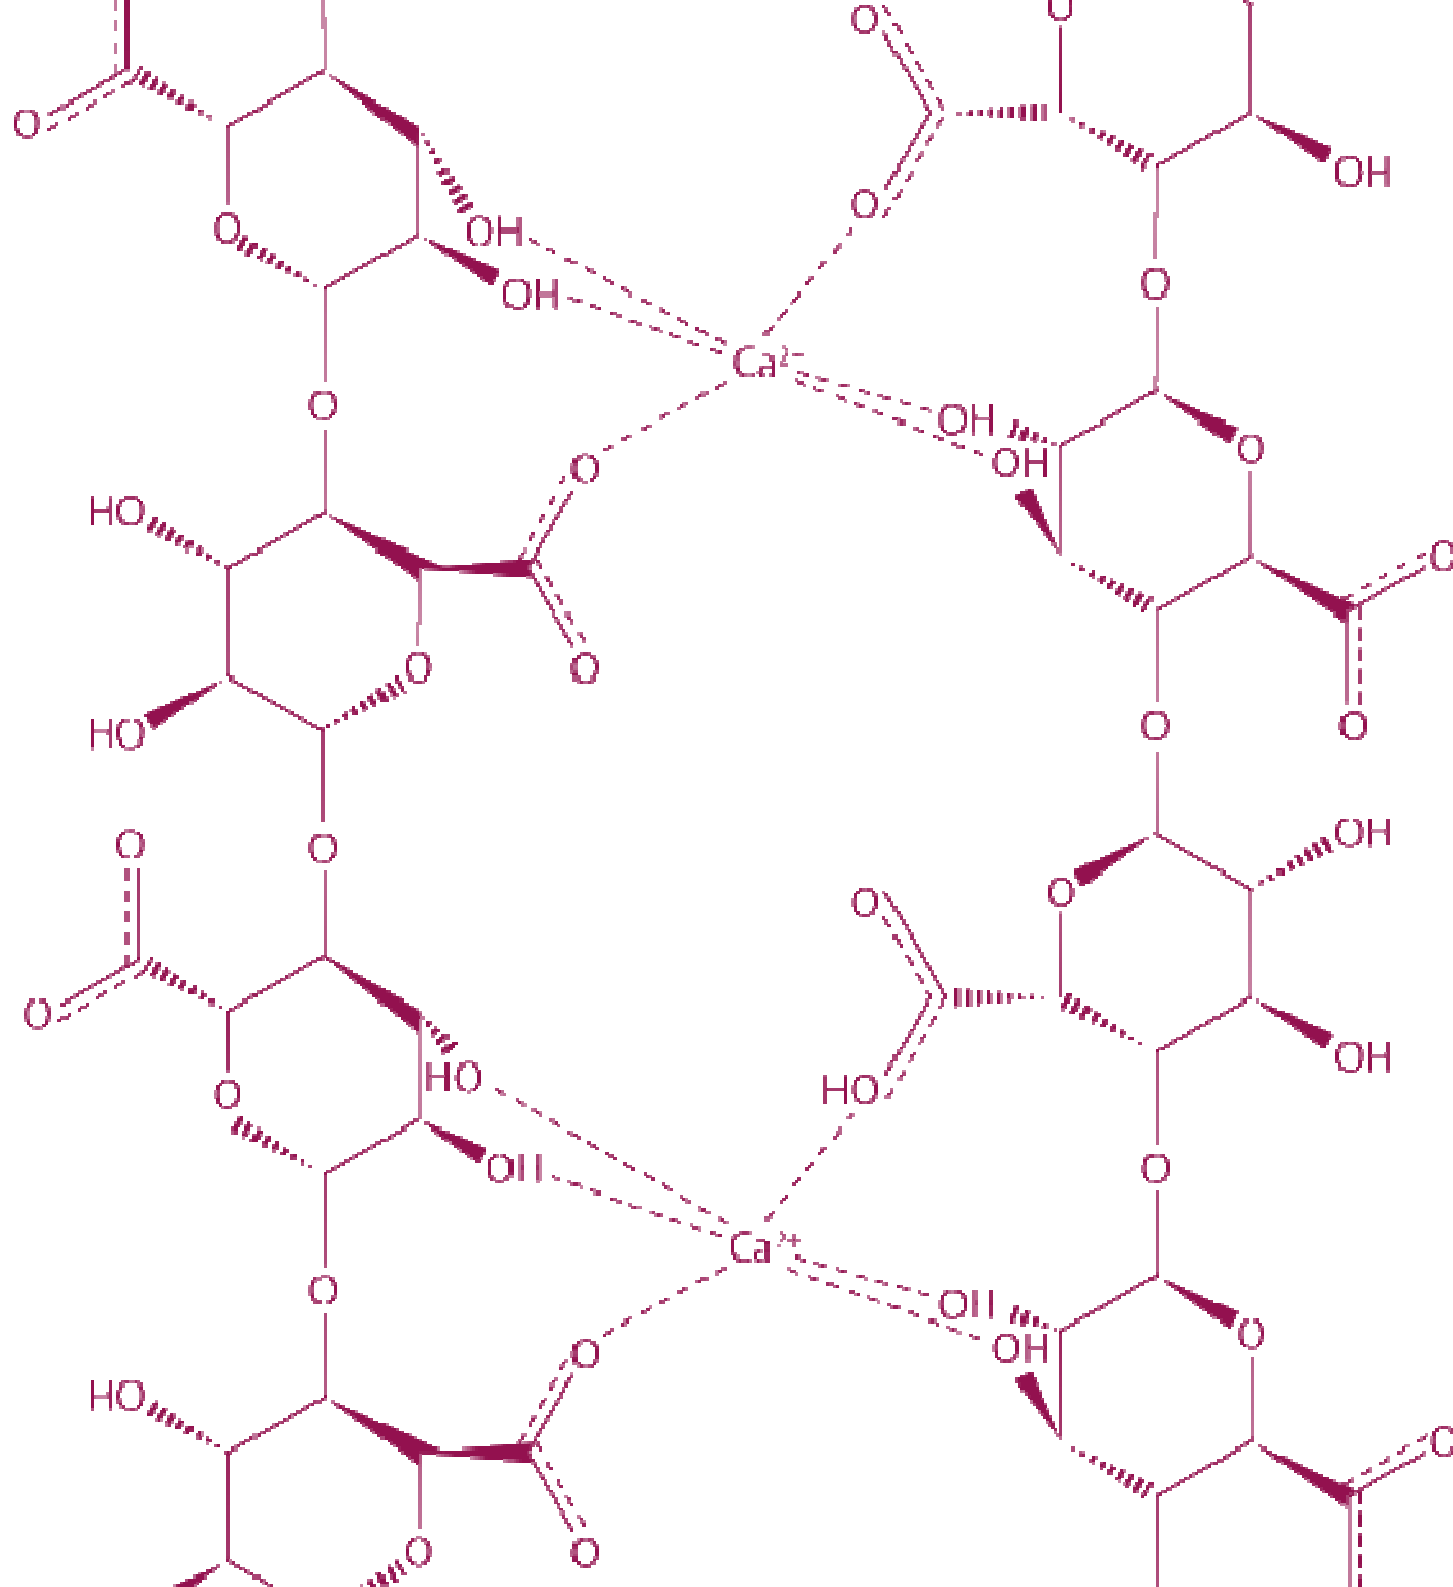

Herstellung von Algenbällen
Experimente

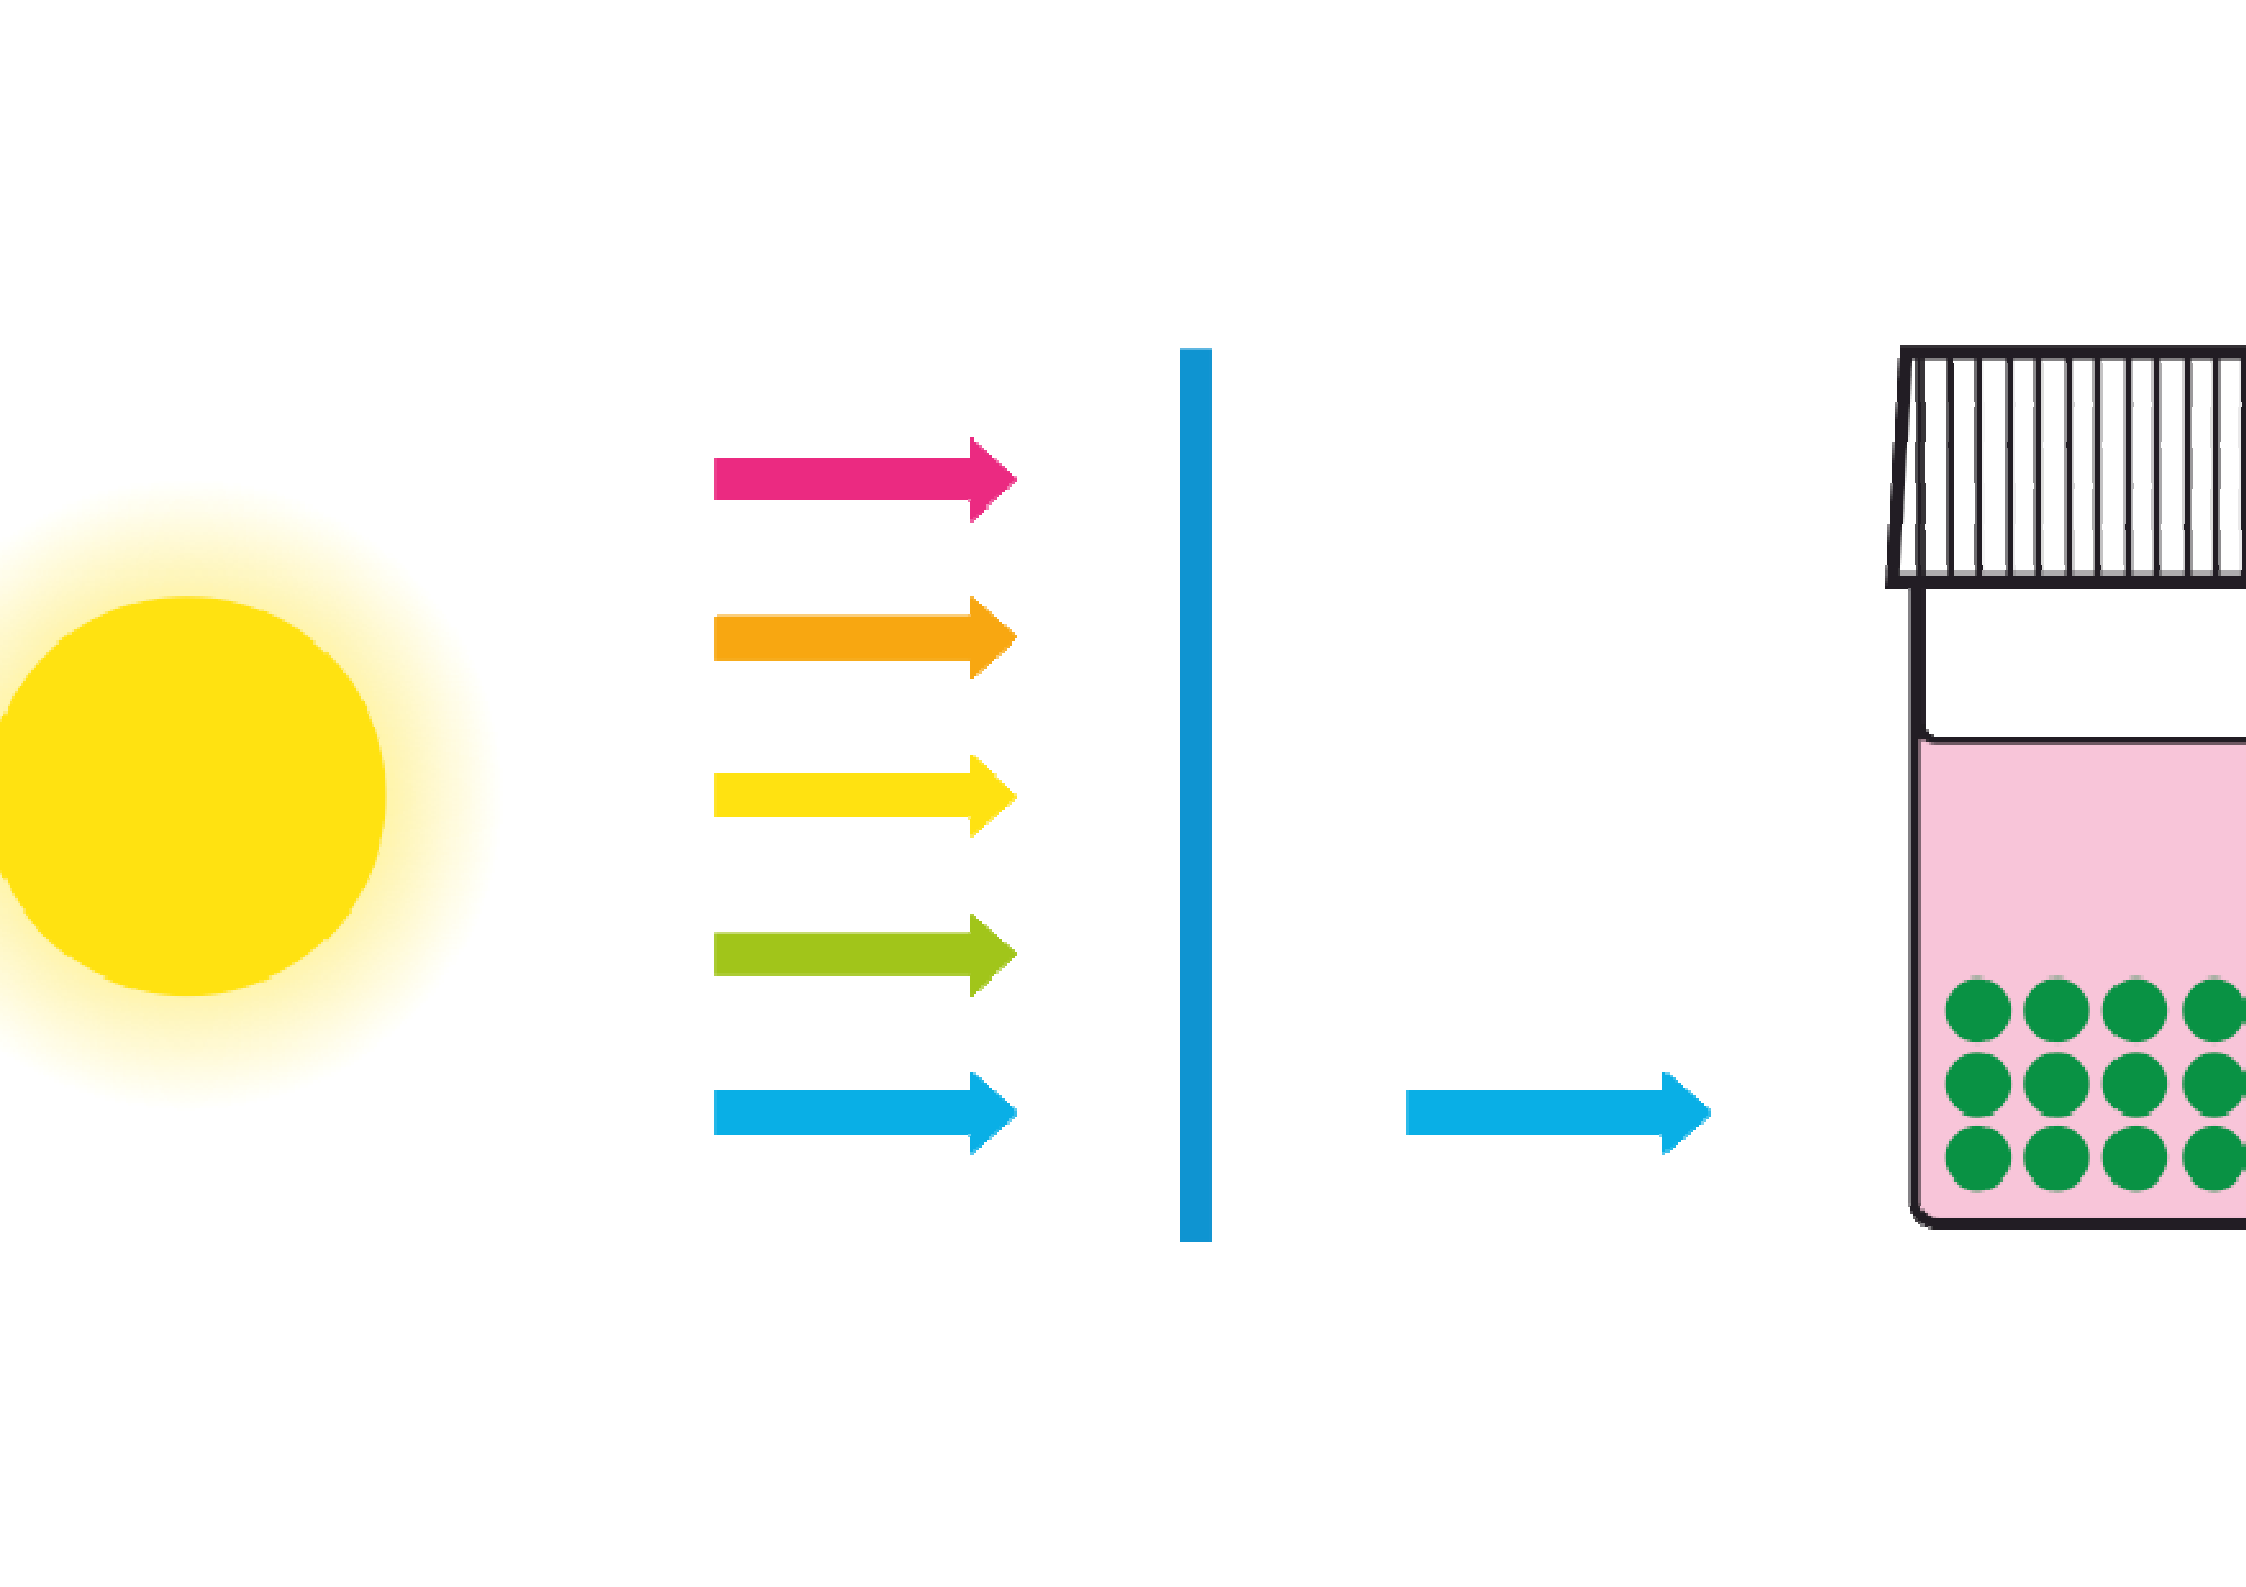

A close-up photograph of brown seaweed (Braunalge) with a light blue text overlay. The seaweed consists of thick, yellowish-brown stalks and smaller, more delicate branches. The texture appears moist and glistening. The text overlay is a semi-transparent light blue rectangle containing the text 'Braunalge, zur Herstellung von Alginat' in a bold, black, sans-serif font.
